

HOME HEATING OIL

- **Heatdoc™** - Our Flagship heating oil formula with tri-stabilizers for low sulfur, ultra-low sulfur, and biodiesel blends.
 - **Greenburn®** - Multi-functional heating oil treatment enhanced with a proprietary combustion optimizer.
 - **LP-1000** – Pour point reducer designed to improve oil flow in outside storage tanks.
 - **ODT-3LP** – Our flagship heating oil treatment Heatdoc™ fortified with cold flow protection.

DIESEL PERFORMANCE

- **OPT™** - A Next Generation detergent designed to protect today's diesel fuel as well future injection platforms.
- **WDA – CF – Series** – Commercial grade cold flow protection combined with 3x the industry standard deicing protection.
- **Winter Diesel Additive 2010** - A multifunctional winter diesel cold flow fuel additive complimented with a synergist and WASA.
 - **Emergency Diesel Fuel Treatment** – For use when fuel has gelled, or when you anticipate extreme cold weather.
- **Summer Diesel Additive 5000** – Seasonal fuel conditioner that contains detergent, corrosion inhibitor, stabilizer and water control.

TERMINAL FUEL ADDITIVES

- **Biodiesel Stabilizers**- Designed to preserve and protect biodiesel and biodiesel blends.
- **Performix™**- Gasoline detergent that helps clean-up and keep-clean injectors at a cost effective treat rate.
 - **Advanced Lubricity** - A synthetic lubricity and conductivity improver for ULSD products.
- **Conductivity Improver** – Provides anti-static protection from potential ignition source that may cause spark.

MARINE FUEL TREATMENTS

- **Slipstream® Premium Marine Diesel Additive** - Increases cetane and cleans injectors, restoring power.
- **Slipstream® Premium Marine Gasoline Additive** - Designed to prevent the problems associated with ethanol blended gasoline.

SPECIALTY PRODUCTS DESIGNED TO SAFEGUARD ALL LIQUID FUELS

- **Water Management** - Addresses water in tank storage and emulsifies the water to be moved out of the system.
 - **Microbiocide** - An advanced biocide that addresses bacterial contamination in all types of fuel.
- **Desiccant Dryers** - Dryer that is easily installed on your vent pipe to keep moisture and dust out of your storage tanks.
- **Tank Breathers** - This technology filters out dirt and water particles before going into your bulk tank and/or vehicle.

Advanced Fuel Solutions - Enhancing The Fuel That Powers Your Business

Note: All of the above products are available in bulk, totes, and 55-gallon drums. Most are also available in pails, jugs, and quart bottles.
