ADVANCED THINKING AND NEXT GENERATION TECHNOLOGY
ENHANCING THE FUEL THAT POWERS YOUR BUSINESS.

AFS MGA

Marine Gasoline Additive

AFS MGA is specially formulated for marine engines and is designed to prevent the problems associated with ethanol blended gasoline, such as phase separation, moisture contamination, poor stability and the formation of power-reducing carbon deposits.

Addition

AFS MGA may be continuously or batch blended as a concentrate or as a stock solution. Proper blending and handling procedures must be followed.

For personal safety, first aid, storage and handling, see the safety data sheet (SDS) for product specific information.

AFS MGA is a fuel additive that provides the following functional and performance benefits:

- Helps to keep clean valves and injectors
- Helps prevent phase separation
- Eliminates carbon, varnish and sludge
- Reduces gum formation
- Helps control harmful peroxide formation
- Provides seasonal storage stability
- Excellent combustion chamber deposit control
- Good demulsibility

Typical Properties

Appearance	clear, yellow liquid
Specific Gravity @ 60°F.....	0.873
Density, lb./gal, 60°F.....	7.29
Flash Point, PMCC	115°F
Viscosity, cSt @ 77°F.....	4.4
Pour Point °F.....	-40
Recommended Treat Rate.....	1:3000
